<p><strong>

    "Cinema is the most beautiful fraud in the world"

    <br>                                    - Jean-Luc Godard

    <br>
```

Welcome to the world of movies

 If you are a cinema lover you are at the right place

The movie industry as we know it today originated in the early 19th century through a series of technological developments: the creation of photography, the discovery of the illusion of motion by combining individual still images, and the study of human and animal locomotion.

    <h2>REVIEW:</h2>

    <p>The Beginning

        Hitchcoc22 October 2021

        Having read the book a hundred years ago, it took some time to begin
to understand what was going on. If there is a criticism that many share, it
is the pacing of the first part of the film. It needed something to set the
scene for us, to show us who the strong and the weak were. I'm not much for
narration (show me, don't tell me), but it may not have been a bad idea. The
scenes are magnificent with special effects off the chart. Many desert travel
scenes are quite endless. How do you spruce up a desert. I thought the sand
worms were a little one dimensional. I know there is another film down the
road</p>
